There are three elements to consider when deciding what option best suits your portrait session needs.

1. EDITING OF YOUR PORTRAIT SESSION

-Would you like your portrait session edited or would you rather do it yourself?

-You can select to have your session edited (General Color & Tone and selecting favorites) from all of your photographs taken during your portrait session. This is a professional process using hi-end software where several hours of love are spent editing through your images to find the very best ones for you ... 50-60% edit. You will receive anywhere from 60 to 250 photographs per hour after editing depending on how many photographs were taken. This is a flat rate for your entire portrait session. With orders over \$900 editing is included.

EDITING- \$200

40-60% of your photos will be edited. You receive the rest of the images from the entire portrait session including blinks and outtakes~ no charge. (Obvious blurry photos will be removed).

2. RESOLUTION OF PHOTOS- This depends on what you want your photos used for.

Whether you would like to purchase your CD of high resolution images for printing (like buying the negatives) or have the low resolution thumbnails for review and emailing to friends and family. This is a flat rate for your entire portrait session.

HI RESOLUTION DIGITAL IMAGES (for printing) ~ \$400

Video Montage of your best images is also available.

LO RESOLUTION DIGITAL IMAGES (for emailing and posting online) ~ \$200

3. HOURLY PORTRAIT FEE

The hourly location portrait session fee is \$200 for the greater Sacramento Area. I recommend 1.5 hours minimum for your first session. 300-400 photographs are taken each hour.

One hour studio portrait session ~ \$200

Two hour studio portrait session ~ \$400

Three hour studio portrait session ~ \$600

4. INDIVIDUAL FILES

If you purchase the low resolution digital files and would like to print some you can buy the files...

One digital file ~ \$30

5. RETOUCHING & SPECIAL EFFECTS - This is where the real magic happens! A unique 'look' is created and that special attention is given like in magazines.

Retouching is the enhancement of the face and body by removing blemishes and decreasing circles under the eyes as well as contrast adjustments, saturation, color balance, and sharpening. The software for this process and the editing experience is top notch.

One digital file ~ \$30

SPECIAL ALBUMS AND BOOKS

We select half of the images for your album and do special effects on them in addition to your retouched files. You will also receive these with your high resolution retouched files for your album.

***See Examples below.

9 or 10 page album (5 images will have special effects applied) ~ \$100

20 page album (10 images will have special effects applied) ~ \$200

6. PORTRAIT SESSION LOCATION OPTIONS

In-door with natural light. Rooms and bedrooms and Hotel Rooms with large windows are preferable.

Out-Door-On location: Location and time of day can make a huge difference. We'll discuss your best options.

PACKAGE OPTIONS

(You can combine the a la carte items in any combination)

Deluxe package ~ \$1450

High resolution digital files ~ \$400

Three hour studio portrait session ~ \$600

A 5x7 Black Album with 10 images. All images are retouched and custom printed. ~ \$400

Low resolution digital files ~ \$200

Two hour studio portrait session ~ \$400

A 5x5 Black Album with 10 images. All images are retouched and custom printed. ~ \$300

Editing for your photographs 40-60% ~ \$200

Classic package ~ \$400

A. You receive all of the images from the entire portrait session including images that did not come out
~no charge

B. Low resolution digital files ~ \$200

C. A one hour portrait session ~ \$200

These albums provide you with an incredible value and I encourage all of my clients to have an album and the high resolution retouched digital files of their favorite photographs! One of these options is the best way to do that.

Canvas Prints, Poster size and Beveled mounts are also available.
